

Icon Change Parts are designed to your specifications and are 100% Australian made. From our design department through to CNC routing and laser cutting, all stages of the process are undertaken locally and are based on your bottle drawing and samples. All Icon Change Parts are made from the highest quality food grade stainless steel, HDPE, Acetal, or UHMWPE. Change Part sets are clearly identified with colour coding for easy ID.

QUALITY

Our change parts are designed to last and are made from the highest quality materials with function, robustness, & usability as a focus.

AFFORDABLE

With the latest design and CNC technology, Icon can efficiently produce high quality change parts to your requirements, while ensuring they are competitively priced.

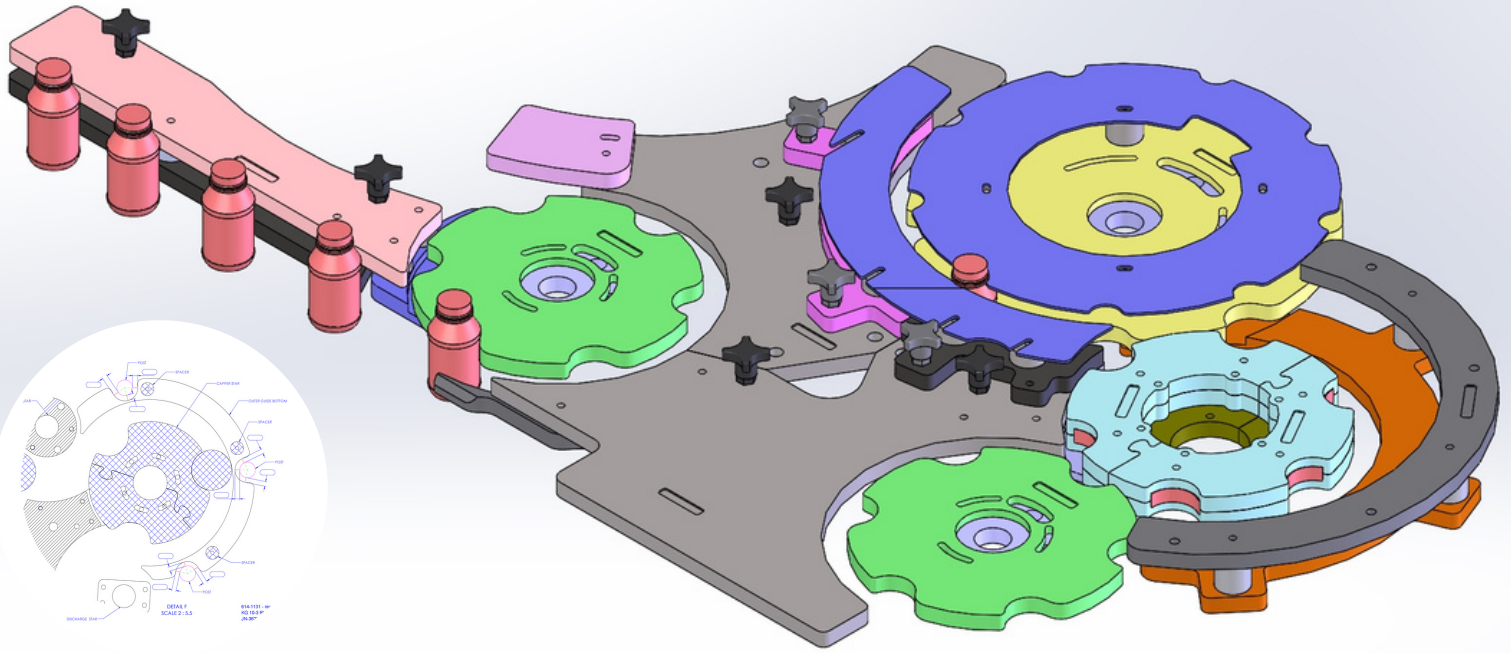

PRECISION

Icon ensures that the bottle features, equipment spec, process, and environment are all considered. Our change parts are made with precision & productivity in mind.

Icon produces standard and custom Change Part Trolleys allowing for efficient and safe change over. Colour coded Change Parts allow for easy identification avoiding accidental damage and unnecessary delays. Icon's trolleys are made from 304 stainless steel (316 available) and fitted with high load industrial stainless steel castors to allow for easy movement and storage. Trolleys and racks can be made in full stainless steel or can include HDPE and all made for sanitary environments. Designed to store complete sets of change parts including infeed scrolls and capping components, such as sorting wheels, collets, etc.

Spare Parts & Accessories

- Change parts to suit any bottle
- Change parts to suit any equipment
- Cap specific parts
- Spare parts and replacement components readily available
- Anti spin solutions
- Easy change options
- Colour coded and full colour options
- Other parts and accessories available
